> GRATEFUL-COMFORTING. EPPS'S COCOA

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocos. Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle haladies are floating around us ready to attack whereever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette. Made simply with boiling water or milk. TWO AT A TIME. How the Washingtons Defeated the Baltimore Ball Tossers.

Three games were played in the Atlantic Association championship race yesterday, Washington, with remarkable modesty, taking but two of them. The readers of THE STAR have already learned how the Senators downed the Wilmington team. The score was 6 to 0. Later in the afternoon they turned their attention to the Baltimore team. The Orioles, burning with impatience to show the Senators that they-the Senators-were not in the race with them-the Orioles-stubbed their toes very severely and fell prostrate to the tune of 8 to 3.

Washington won hands down, but the game was a very snappy one. Luck was all on the side of the home team, the visitors playing very poor ball at times, muffing like amateur at the most inopportune moments. The game was witnessed by over 2.500 people. Phillips and Riddle and German and Townsend were the batteries. Phillips did his usual good work, keeping the rather frequent hits of the oppos-ing team well scattered. In the first inning Baltimore made two scores on three hits, a sacrifice and a fumble by Gleason. Baltimore paid up for this temporary advantage by going all to pieces in the second, while the States-men took advantage of the demoralization to score five times, winning the game. Thenceforth the game was sharp enough. In the third inning a run resulted for Washington. In the sixth Power hit for two bases, a man was given first on balls and Hill made a low throw to Whistler, one run scoring for Baltimore. This was offset in the seventh by Whistler's remarkable hit over Long's head for four bases, the ball going clear into the corner of the fence. The last run of the game was made in the eighth, when Hill gave Henry a fly to muff and Phillips and Riddle made singles. Washington made 7 hits and 4 errors

The other Atlantic victor of the day was Worcester, New Haven being the victim. 10 to 2. Worcester made 14 hits and 4 errors and New Haven 2 hits and 6 errors. New Haven 2 hits and 6 errors.

Other games resulted as follows: National League—Brooklyn 17, Philadelphia 7; New York 1, Boston 0 (13 innings); Pittsburg 5, Cincinnati 3. Players' League—Brooklyn 11, Philadelphia 7; Boston 12, New York 2; Pittsburg 6, Cleveland 5, American Association—Athletic 8, Brooklyn 4; Rochester 3, Syracuse 0; Toledo 4, St. Louis 3; Louisville 1, Columbus 0

4, St. Louis 3; Louisville 1, Columbus 0. NOTES. We are the-leaders. Well! Well!! Well!!! How do you do, Mr.

Tiernan won the game for New York yesterday by his home-run hit in the thirteenth whistler is taking His-ice-wagons O'Brien's place at the first and at the bat is leaving a good margin over. Ezra Sutton has been appointed field cap-

tain of the Hartford team.
Pittsburg has released Paul Hines. Hill played a Denny game at third yesterday. He made several wonderful stops and throws, in both games making six outs and nine assists, with but one error, along with two hits.

The Atlantic race is now in the following condition; Washington is still an easy leader with 11 won, 2 lost, and a percentage of .846; Baltimore and New Haven are tied for second place with 9 won and 6 lost and a percentage of

BUYING GOVERNMENT SUPPLIES. Methods by Which Uncle Sam is a Loser and Business Men Disgusted.

A good many of the reputable business men of this city are disturbed not a little because of the disadvantages they suffer from when competing with less scrupulous persons for the privilege of selling to the government those miscellaneous supplies necessary in the various departments. These supplies include such articles as soap, towels, wash bowls, spittoons, tumblers, brushes of various kinds, feather dusters, dust pans, matches, buckets and a host of other specimens of household bric-a-brac. At first glance it would seem as though any body in possession of the ordinary aggregation of senses could tell whether goods delivered by a contractor are up to the sample or not, but this idea, the dealers say, is fallacious.

HOW IT WORKS. It works in this wise. One of the departments wants ten dozen tumblers. Bids are called for and there are probably a dozen responses. The majority of these give figures that are either identical or within easy reach of each other. One man's price is away below all the others. Of course he gets the contract, and when the time comes delivers the goods. Here is where he gets his fine work in. In most instances the official who inspects the goods is a non-expert employe of the department, and when the glasses are unpacked he looks at them. They correspond with his idea of what a glass should be and he accepts them. Then the contractor makes haste to get his money and skirmish around for more bids; he has made much more on his glasses than any one of his competitors could. The fact is that while the sample upon which the contract was awarded was flint glass, the goods delivered are of that variety known as lead glass—dull in sound, heavier and inferior in every way. His profit has been large and he made it because the inspector had not that ex-

pert knowledge necessary to enable him to distinguish between the two qualities. This same error can easily be made on a score of different articles because of the not easily discovered line which divides the genuine and the highly glossed imitation. AGITATING FOR A CHANGE. In order that the honest, square-dealing merchant may not always suffer from this unconscious discrimination there is a quiet movement on foot to agitate for a change. Among the propositions made is one that most of those interested think would be feasible. It would be to have the department summon to its aid a board of

three experts—employes in three different establishments dealing in the kinds of goods to be examined. These men could be sworn to do their duty without partiality, but the fact that they were attached to different houses would effectually prevent a community of interest. Imposition on the government by tricky bidders and contractors would then be

ANOTHER CAUSE OF COMPLAINT. Another feature in this same government contract business is the cause of much complaint. That is the manner in which the goods gross of matches, it may be, is one item, and instead of having them delivered at one time the chief clerk will request the contractor, once in every two or three weeks, to send him up a gross. It costs more to deliver the matches the contract in a costs.

than the contract is worth.

Sometimes a dealer contracts to supply certain article in a large quantity at the ruling price for that period when he makes his bid. He cannot deliver the stuff in bulk and if the market should chance to move up on him before the end of the contract year he is in a

A PURCHASING AGENT NEEDED. Some are openly advocating the appointment by each department of a purchasing agent, who should be situated as is the sergeant-atarms of the Senate, for instance. He buys in open market and makes affidavit to the effect

that no officer of the government has been or will ever be, directly or indirectly, benefited by connection with the purchase.

Incidentally it may be interesting to know DRY GOODS. the system appear ludicrous. Only a little while ago one of the big departments invited bids from twenty-six dealers for the supplying of a two-quart demijohn.

NOT A NEW IDEA AFTER ALL. In considering the innovation that seems to have been made by introducing a spring, adjustable for weight, into the frame of the AMERICAN RAMBLER it is found to be not wholly a novelty—merely a new and common sense way of applying an old idea.

All of the best locomotives have springs between their driving wheels and frame. All of the high-grade carriages have their occupants insulated by comfortable springs.

Antiquated vehicles do not have the modern improvements which make the RAMBLER so easy running and comfortable to ride. It is not built on the hay rack or lumber wagon principle. Give us a call and see the wheel from a closer and better point of view.

Prices from \$65 to \$150. Terms reasonable.
